

## Conception

studer + raimann ag supports you in the planning of the commissioning of ILIAS and in the introduction of training and further education processes.

### Example „Introduction of processes for training and further education”

Together with you, we develop a concept for the training and further education of your employees. In joint workshops, we analyse your needs and create the necessary processes.

The concept includes the following:

#### Target group(s)

- Registration of a new target group

#### Educational needs

- Creation of competency profile for each target group
- Identification of educational needs (derived from the competences required)
  - o Creation of training offers
  - o Creation of training plans
- Determination of the content of the specific training offerings
- Course content creation
- Identification of future competencies or educational needs

#### Training plan / implementation

- Do the training planning
- Carry out / complete the training

#### Evaluation and revision

- Evaluation of the employee's trainings per target group
